

## Sketch 1: Found Object

Format: 8 ½ x 11 or 9 x 12 Medium: pencil

Carefully render a small object of some visual interest. The object should be about the size of your hand. A water bottle, shoe or keychain would all work well. Show a box container in the rendering that would be just large enough to hold the found object. Render the background and be sure to include shade and shadow. You may crop your found object and its container to fit the picture frame.

In terms of technique, use of a full range of tonal values from black to white and strive for strongest tonal contrast at the focus of your drawing.
